

## NATURAL POLISHER EXFOLIANT

When it comes to dermabrasion, the scrubbing catalyst and essential ingredients have a significant impact on the level of effectiveness. Savarnas Mantra Natural Polisher Exfoliant is a powerful exfoliator that uses medical grade aluminum oxide crystals to scour away dead skin, and wash away dirt with stunning results.

Aluminum Oxide Crystals are among the best known exfoliation mediums. Their size, shape and molecular structure make for superb quality.

Provided to you in a condensed granular format, Savarnas Mantra Polisher Exfoliant is an abundance of scrubbing crystals at your disposal.

With the addition of Red Tea Extract, Seaweed Extract and Hyaluronic Acid, this wonderful scrub helps balance moisture, while delivering skin nourishing anti-oxidants and mineral goodness.

### benefits

- Exceptional exfoliation, dead skin cell removal
- Gently lifts dirt and excess oils
- Exposes vibrant new skin
- Reduces the appearance of wrinkles and fine lines

### daily application

Morning and Evening

### directions

Wet face with water and apply a small amount of product into the palm of hand. Add a few drops of water and work on face or body. Avoid eye area. Rinse with lukewarm water.

### ingredients

Alumina (Aluminum Oxide Crystals), Purified Water (Aqua), Sodium Laureth Sulfate, Cocamidopropyl Betaine, Lauryl Glucoside, Glycerin, Aspalathus Linearis (Red Tea) Extract, Chondrus Crispus (Seaweed) Extract, Butylene Glycol, Hyaluronic Acid, Eriobotrya Japonica Extract, Phenoxyethanol, Ethylhexylglycerin.

# how it works

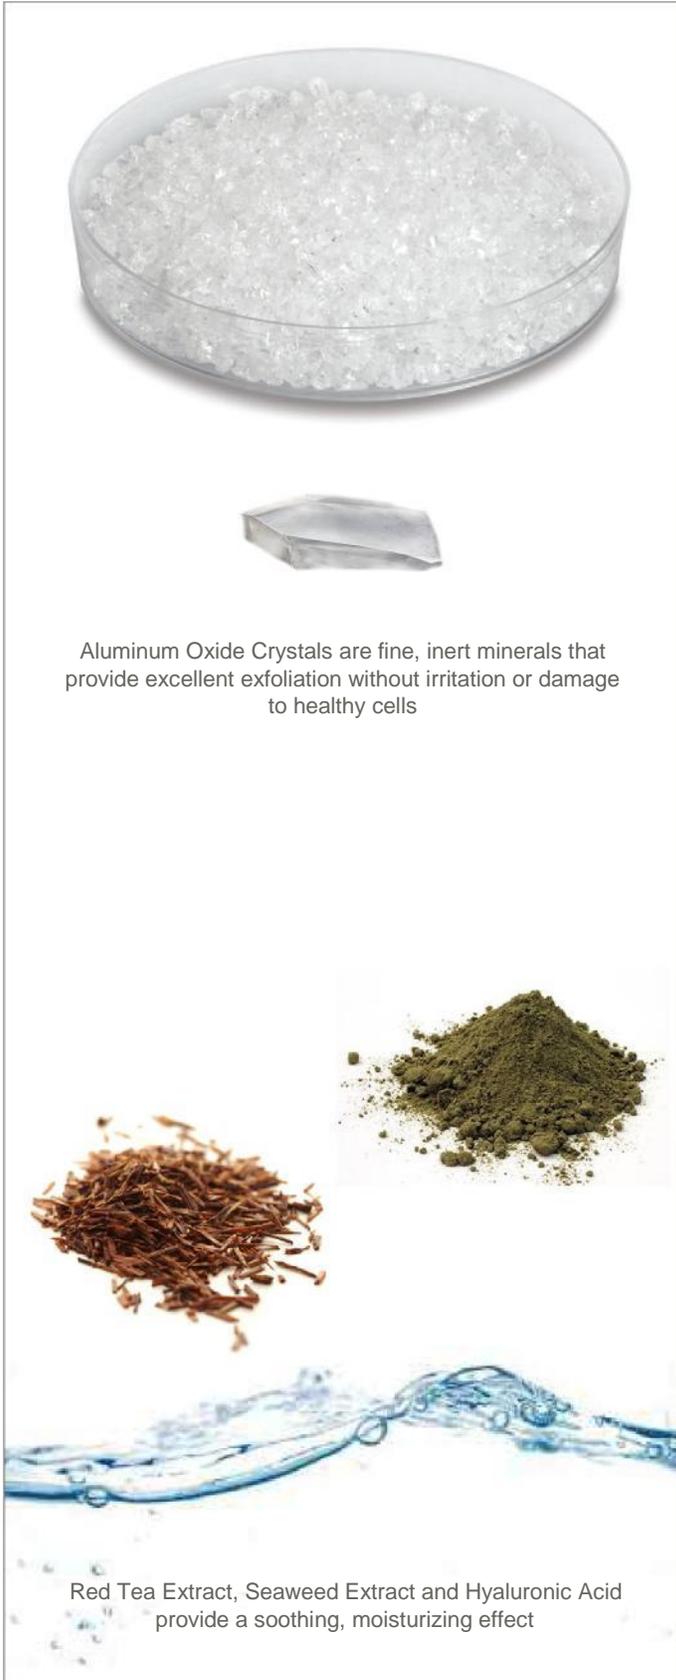

In order to protect you from the elements, your skin cells undergo a natural process called Cornification. During Cornification skin cells migrate to the outermost frontier of the epidermal layer where they die and fill with keratin (tough bundles of protein fiber). This creates the resilient epidermal barrier of the skin.

The skin naturally sheds dead cells from this barrier in a constant circulation of desquamation (shedding), however the regulation of the shedding isn't always normal and excess dead cells can build up. Age, nutrition, the weather and genetics can all affect the rate and frequency of this cycle, diminishing the quality of your appearance.

Exfoliation is the perfect intervention in order to regulate the desquamation cycle. The effectiveness of the exfoliation is determined by the quality of the abrasive medium and any supplemental nourishment provided to the skin.

Savarnas Mantra Natural Polisher Exfoliant uses white Aluminum Oxide crystals as the scouring catalyst. These crystals are inert minerals that do not cause adverse or allergic reactions to the skin. They have low heat retention and are extremely fine, so they don't rupture or damage healthy and living cells, yet are still very adept at lifting dirt and dead cells.

Red Tea Extract, Seaweed Extract and Hyaluronic Acid provide a soothing, anti-oxidant and moisture balancing benefit, to help compensate from any moisture loss that occurs during the abrasive exfoliation action.

Aluminum Oxide Crystals are fine, inert minerals that provide excellent exfoliation without irritation or damage to healthy cells
