

NATURAL AGE DEFYING EYE CREAM

You may have seen cucumber slices applied to the eyes during facials or massage treatments and it's no secret: The moisturizing benefits of cucumbers used on soft skin around the eyes have become a reliable and effective way for hydrating and softening the delicate skin in that area. We've taken that tried and tested cucumber benefit and all the beauty it provides, and fashioned it into the comfort and convenience of a cream.

Savarnas Mantra Natural Age Defying Eye Cream uses a blend of Cucumber Extract, Peptides, Vitamin E and Retinyl Palmitate to provide your skin with generous nourishment and hydrating qualities that help alleviate dark circles, stimulate collagen growth, reduce wrinkles and fine lines, and restore a youthful and energetic appearance to your gaze.

benefits

- Moisturizes and softens the skin
- Helps alleviate dark circles
- Positively influences Collagen growth

how it works

The Cucumber is a fine example of botanical ingenuity that we've incorporated into a popular and effective product. Savarnas Mantra Age Natural Defying Eye Cream uses a high quality Cucumber Extract, rich in vitamins nutrients and essential oils to provide the cool soothing benefits and skin rejuvenating properties which cucumbers are well known for.

Safe and gentle on the eyes, this cream packs some comprehensive benefits thanks to additional actives.

We've added Palmitoyl Oligopeptide and Palmitoyl Tetrapeptide-7 Peptides to help stimulate collagen growth, which helps in the reduction of fine lines and wrinkles around the eyes.

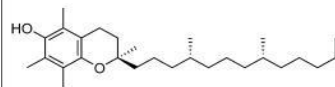

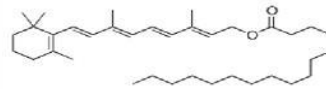

Peptides are short chain amino acids, which due to their small molecular size, are excellent at penetrating the epidermis of the skin. These peptides positively stimulate the skin's natural ability to produce and repair Collagen, which results in reinforcing the delicate skin around the eyes. This provides a healthier appearance and reduces the contrast of wrinkles and fine lines.

To assist in moisturizing and protecting the skin we've added Antioxidants; Vitamin E and Retinyl Palmitate (Vitamin A). These two remarkable ingredients help protect against the damaging and aging effects of free radicals. Both these forms of vitamins provide additional moisturizing oils to assist the Cucumber extract.

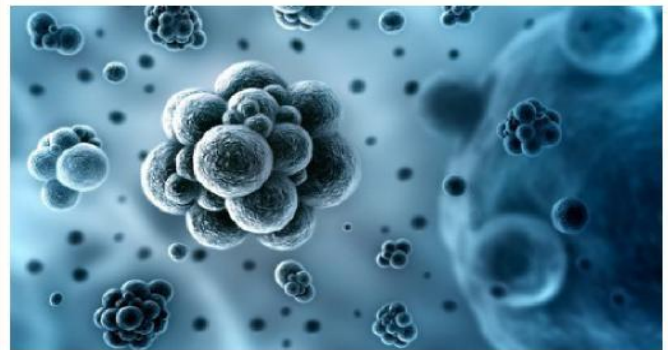

With such a harmonious blend of nature and science, it's little wonder that this soft, cooling cream is a preferred choice for users.

Cucumbers are rich in vitamins and nutrients, providing cool soothing and moisturizing benefits to the eye area

Vitamin E and Vitamin A provide antioxidant benefits by protecting against damaged caused by free radicals

Collagen Stimulating Peptides help reduce fine lines and wrinkles around the eyes
